Excerpt from Building Timbers and Architects Specifications, Incorporated With Which Is Part of Haworth's Practical Timber Measurer This book differs from the many excellent existing works upon Timber now available, inasmuch as it confines its notice to those woods which have been, are, or promise to be, of special interest to the architect, contractor, builder, timber merchant, and student. It deals with the commercial side of the subject, and keeps in View the particular requirements of the architectural profession and the building and timber industries. It also deals brie?y with woods which, though not in regular use for building, are of sufficient general interest to warrant passing notice, and it supplies an extensive list of Canadian and Australian woods often used in the Colonies, which may come into use in this country. Our thanks are due to a number of eminent timber firms who have been consulted concerning certain woods they especially handle. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
