Format: PDF
Size: 7.33 Mb

Excerpt from The Construction of the Wood-Hoop Silo The construction of the wood-hoop silo is simple, for there are but three essential parts to the silo proper: (a) the hoops which resist the bursting pressure of the silage; (b) the diagonal braces between the hoops which are needed to give the silo rigidity; and (c) the lining of tongue and groove staves. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
