Excerpt from Elementary Woodworking In order to obtain good results in the using of tools it is necessary to know their construction, how to properly sharpen and adjust them, and the correct method of handling them. It is also essential to know how to lay out and work the material or stock. Carelessness or a lack of knowledge is invariably followed by a failure. It is more important at first to work carefully and accurately than rapidly. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
