Excerpt from The Elements of Wood Ship Construction Board Emergency Fleet Corporation, for use in its classes in Wood Shipbuilding. This text on wood shipbuilding was prepared by W. H. Curtis, Portland, Oregon, for the Education and Training Section of the Emergency Fleet Corporation. It is intended for the use of carpenters and others, who, though skilled in their work, lack the detail knowledge of ships necessary for the efficient performance of their work in the yard. Sea-going vessels are generally built according to the rules of some Classification Society, and all important construction and fastening details have to be passed upon by the Classification Society under whose inspection the vessel is to be built. Due to this fact, requirements may vary in detail from types of construction here explained. It is hoped, however, that this book may be helpful to shipbuilding classes and to individual men in the yard. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
