Excerpt from A Laboratory Course in Wood-Turning The practice of wood-turning is an art relative to which there is little published, and there is, in consequence, little chance for arriving at conclusions as to the best method for performing any given operation; so there is a wide diversity in the methods by which different Operators arrive at the same results. Some use one tool almost exclusively, while others use a large variety of tools. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
