Author: Phillip Davies, Stephen Blair  
Pages: 424 pages  
ISBN: 9781447940234  
Format: PDF  
Size: 9.76 Mb

Written by experienced tutors in line with the level 2 specification to help prepare learners for progression into an Apprenticeship and employment. Professional case studies focus on employability skills and help learners develop the soft skills to aid job hunting and performance in the workplace. Content is logically designed and highly visual which makes plumbing principles easier to digest, understand and remember. Activities throughout give learners the chance to reinforce knowledge and multiple choice questions at the end of each chapter means learners can test what they have learnt. Learners can record the skills they have learnt throughout the course as evidence for employers. Mapping information makes clear what skills and knowledge can be applied when learners begin their Apprenticeship.
