Excerpt from Naval Architecture: A Manual on Laying-Off Iron, Steel, and Composite Vessels This Manual has been written to meet a need amongst junior ship-draughtsmen, apprentice loftsmen, and class students. The Author trusts it may answer its purpose, for he has sought to make the subject clear by graphic sketch and everyday shipyard language. After careful consideration, it was thought it would be almost a repetition to enter very fully into the laying-off Of war vessels on the loft ?oor; attention, however, has been given to explaining some Of the more prominent parts which distinguish this class Of work.
