Excerpt from A Pocket Manual for the Practical Mechanic: Or the Carriage Marker's Guide For years I have been contriving to complete a new and simple rule that would teach the craft a shorter and much needed way to work, so that more work might be done in a day than heretofore, thus bringing more wages and satisfaction to the mechanic. I have met persons who, for years, had tried to learn the French rule for drafting, but gave it up in despair. It was too long and too hard to learn. The French rule is more adapted to architecture and is highly useful, more so than many mechanics can comprehend.
