Excerpt from Selling Woodlot Products on Michigan Farms The majority of logs me now cut 16 feet long where possible, with a few inches extra to allow for injuries to the log ends in handling. Where 16 foot logs can not be obtained because of some defect or crookedness of the tree trunk, 14, 12, 10, or even 8 foot logs can often be cut, and these should be included in the list. When 16 feet is the standard length, 8 foot logs can be recorded as half-logs. Allowance must be made for the stump, which will usually vary in height from 6 inches to 2 feet, depending on the size of the tree. For medium sized trees a good rule is to make the stump height about equal to its diameter. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
